*"Being a male, I tend to overlook my skin. Over the years, stress has definitely taken a toll on my appearance. My dermatologist recommended this treatment and I am so pleased with the results. My schedule is usually busy but this works for me because the treatments are so quick."*

- Patrick

# VENUS TREATMENTS

in the media

Venus Treatments are highly sought after by Hollywood stars and celebrities worldwide as a part of their regular beauty routine. Their hectic schedules and constant exposure to the camera means that they must rely on safe treatments that deliver the best results quickly, and without any downtime. You too can enjoy a red-carpet beauty treatment today.

Ask your physician for more information about Venus Versa™ treatments!

Introducing

# VENUS VERSA™

Shining the Light on Pre-mature Aging

Venus Versa™ is a *powerful, non-invasive* Intense Pulsed Light treatment that reverses the signs of the greatest cause of pre-mature aging...the sun. It's those ultraviolet (UV) rays that are responsible for the embarrassing brown spots on your face, hands, chest or any area that remains uncovered.

There is other damage, as well: enlarged pores, loss of texture and tone and skin discoloration. Over time, the elastin fibres – which give your skin that firm, youthful, bounce-back, simply break down and your skin sags.

## What is the Venus Versa EXPERIENCE

Designed with you in mind, Venus Versa™ is totally *safe, virtually pain-free, with minimal side-effects and no down time*. Lasting 15 – 20 minutes, per procedure, results are noticeable from the first session and if brown spots are your only concern, one or two treatments might do it all. 3 – 4 treatments are optimal for longer-lasting results, up to a year or longer.

Of course, treatment times always depend upon the area and severity of the concern. With maintenance visits scheduled throughout the year, what a joy to know that your skin will always look firmer, smoother, younger with *even color and radiant tone*. Venus Versa™ will always make you shine.

*"I love the radiance in my complexion. The treatment has improved my skin and I no longer feel the need to cover my skin up with makeup now! Most of all, the treatment was quick and virtually pain-free." – Tania*

# HOW IT WORKS

The Intense Pulsed Light procedure delivers a strong, precise infrared light to penetrate and pulsate through several layers of skin. Targeted to the exact depth necessary to treat your specific areas, our advanced Intense Pulsed Light restores and rejuvenates damaged skin cells on the molecular level. It also repairs broken blood vessels and reduces rosacea, too.

Delivering more energy and with our one-of-a-kind SmartPulse technology maintaining an even energy level throughout, Venus Versa™ is safe and fast. Our patent-pending, revolutionary, built-in cooling system means increased safety and comfort for you. Unlike other procedures, our treatment covers a larger area to keep your sessions shorter and your visits fewer.

Most exciting, it also stimulates the production of new elastin that allows the improvement to continue weeks after the treatment is complete.
